Maritime economy, investing in the seaside real estate, education, innovation, ecology… These are only a few subjects of the sixth edition of the event that will bring to Szczecin entrepreneurs, managers, experts, and decision-makers from all over Poland and Europe. The event will take place on the 15th and 16th June 2018, and will accompany the World Maritime Day.

The congress will start with a panel on the perspectives of sea tourism development. The issue will be regarded from the point of view of entrepreneurs investing in the hotel and apartment infrastructure at the seashores, but also from the standpoint of government and local administration. Congress participants will also be able to select e.g. three thematical sessions on shipping, ports, and shipyards; education and innovation; and fisheries and ecology. These will be attended, in the role of speakers and experts, by CEOs of companies leading in the discussed fields, ministers, local administration representatives, and scientists. The discussed issues and discussion results are not merely theoretical musings. As formed postulates, they will be later delivered to the decision makers of the country.
